

PROTiTE is a high quality, Australian made, environmentally friendly and non-toxic waterproofing range for both trade and DIY.

Durable waterproofing solutions for exceptional results.

BP32 - Bitumen Membrane

PROTiTE BP32 Bitumen Membrane is a water-based copolymer modified bitumen liquid membrane for general multi-purpose waterproofing tasks. Suitable for internal and external use, above and below ground. It dries to form a black, glossy flexible and firm membrane. For added protection in full sun, coat with acrylic paint.

UT77 - Under Tile Membrane

PROTiTE UT77 Under Tile Membrane is a polyurethane waterproofing membrane specifically formulated for bathrooms, laundries, decks, balconies, terraces and other wet areas. Use prior to installing mortar beds, render or tiling. The membrane forms a blue coloured water resistant elastomeric film with excellent durability.

GP45 - General Purpose Primer

PROTiTE GP45 General Purpose Primer is specifically formulated for priming concrete, masonry and fibre cement sheeting. It forms a pink sealed surface ready for the application of water-based waterproofing membranes. The primer can also be used for general sealing of fibrous cement sheeting.

RF66 - Reinforcing Fabric

PROTiTE RF66 Reinforcing Fabric is a high quality non-woven synthetic fabric strip that is used between coats of waterproofing to form a strong reinforced integrated membrane sheet.

WHY USE PROTiTE...

TRADE QUALITY

- Quality commercial grade product.

NEW TECHNOLOGY

- Polyurethane copolymer waterproofing formulas.

COMPLETE SYSTEM

- For most waterproofing requirements.

HIGH QUALITY

- Protite products provides a high quality and durable protection against moisture and weather damage.

EASY TO USE

- Non-toxic & environmentally friendly.
